If you are using Internet Explorer or Chrome you may experience browser warnings for unknown downloaded files. For example if you are downloading an exe file from our site and your browser is discarding or removing your download you can bypass this and permit the download.

If you are seeing the below message on IE after downloading an exe file

Click Actions

On the next window click Run anyway

If you are see the below message on Chrome after downloading

My Easy PC we are here to help you... - How to bypass browser warnings of known downloaded files

Written by Administrator

Click the small arrow

Then click Keep
