

To install IIS (known as Internet Information Services) on your Windows 7 or Vista carry out the following steps.

1. Click Start icon and go to Control Panel.
2. In the Control Panel, click Programs. Under the Programs and Features click on Turn Windows features on or off.
3. In the Windows Features dialog box, look for Internet Information Services and click on the check box. You can also expand this to see all the underlying nodes and services. Make sure all check boxes are ticked under Internet Information Services.

My Easy PC we are here to help you... - Install IIS on Windows 7 or Vista
