

Watch the below video on how to install the Android OS on Samsung Galaxy.

- Download the file from [Google right here](#)
- Place the downloaded file in your PC
- Shut down your phone, and reboot into the bootloader of the Samsung by holding volume up and powering back on
  - Use the volume buttons to choose "recovery" from the list, and select it with the power button
  - When you see the triangle on your screen, hold power and then press volume up and you'll have a list of options, choose the file to update
