

My Easy PC we are here to help you... - How to find what programs are accessing the internet

Written by Administrator

In Windows Vista and above open the Resource Monitor

Click the start button

Type Resource Monitor in the search box

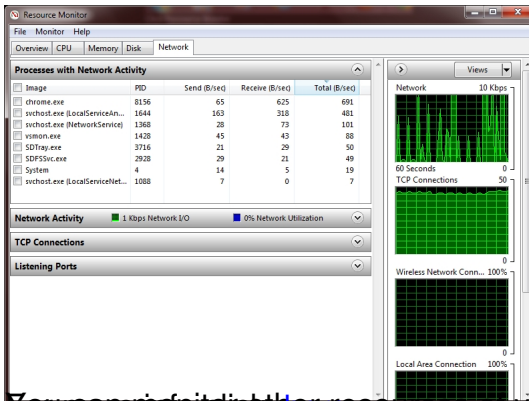

Click Resource Monitor

In the Resource Monitor > click the Network tab

My Easy PC we are here to help you... - How to find what programs are accessing the internet

Written by Administrator

You can monitor all the [resources](#) of your computer with this application
