

Create the contact form in the Contact Form 7

To create a custom submit button click Generate Tag and select Submit button

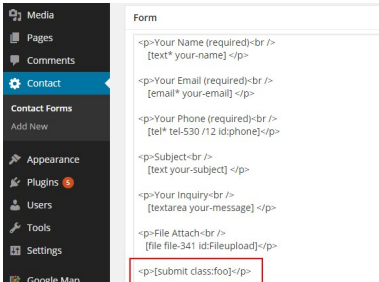

The image shows a 'Generate Tag' dialog box for a 'Submit button'. It has three input fields: 'id (optional)', 'Label (optional)', and 'class (optional)'. The 'class (optional)' field contains the text 'foo' and is highlighted with a red border. Below the fields, there is a text area with the instruction 'Copy this code and paste it into the form left.' and the generated code: `[submit class=foo]`.

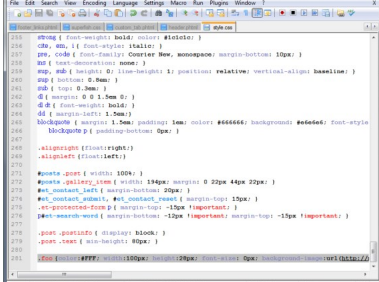

In the class option enter a class name e.g. foo

My Easy PC we are here to help you... - Adding a custom send button in Contact Form 7 for Wordpress

Written by Administrator

the contact button is provided in the WordPress theme's content/themes/yourtheme

Save the form and embed it into a page
