

My Easy PC we are here to help you... - Magento Contact form not sending mail

Written by Administrator

If after setting your email to contact us form is not sending emails. Follow the instructions below to fix the issue.

This is caused by a change in the Magento core code.

Open the file: **app/design/frontend/themedirectory/template/contacts/form.phtml**

If don't find the contacts folder here

Open the file: **app/design/frontend/base/default/template/contacts/form.phtml**

Change the line:

```
<form action="<?php echo $this->getFormAction(); ?>" id="contactForm" method="post">
```

My Easy PC we are here to help you... - Magento Contact form not sending mail

Written by Administrator

To:

```
<form action="<?php echo $this->getUrl('contacts/index/post'); ?>" id="contactForm"
method="post">
```
