

## My Easy PC we are here to help you... - Magento Contact form not sending mail

Written by Administrator

---

If after setting your email to contact us form is not sending emails. Follow the instructions below to fix the issue.

This is caused by a change in the Magento core code.

Open the file: **app/design/frontend/themedirectory/template/contacts/form.phtml**

If don't find the contacts folder here

Open the file: **app/design/frontend/base/default/template/contacts/form.phtml**

Change the line:

```
<form action="<?php echo $this->getFormAction(); ?>" id="contactForm" method="post">
```

## My Easy PC we are here to help you... - Magento Contact form not sending mail

---

To:

```
<form action="<?php echo $this->getUrl('contacts/index/post'); ?>" id="contactForm" method="post">
```
