

If you are seeing a potential attack from an certain IP you want to block follow the below steps.

1. Login to your cPanel or FTP

2. Navigate to the root public\_html directory

3. Open the .htaccess file. If not represent create a new .htaccess file

4. Add similar to the the following:

Order Deny,Allow

Deny from 134.249.140.212

## My Easy PC we are here to help you... - Block an IP from your Webserver

Written by Administrator

---

Deny from 188.163.77.204

(Basically Deny from... then the IP address to want to block)
