

Written by Tom

If you are experiencing a Magento check out problem, where your Magento stops at the shipping method. This is likely caused by an upgrade from a lower version to version 1.9 or above. To fix the issue follow the below instructions.

Go to: `/app/design/frontend/base/default/template/checkout/onepage/payment.phtml`

look for the code

```
<fieldset>
<?php echo $this->getChildHtml('methods') ?>
</fieldset>
```

change it to this

```
<fieldset id="checkout-payment-method-load"> <?php echo $this->getChildHtml('methods')
?>                                     </fieldset>
```

I hope this would resolve your issue.... For original article click [here](#) .
